Index to Volume 22

Journal of the Aeronautical Sciences

Numbers 1–12, January–December, 1955

No. 1, January, 1955, pages 1–72
No. 2, February, 1955, pages 73–144
No. 3, March, 1955, pages 145–216
No. 4, April, 1955, pages 217–288
No. 5, May, 1955, pages 289–348
No. 6, June, 1955, pages 349–444
No. 7, July, 1955, pages 445–516
No. 8, August, 1955, pages 517–588
No. 9, September, 1955, pages 589–660
No. 10, October, 1955, pages 661–732
No. 11, November, 1955, pages 733–804
No. 12, December, 1955, pages 805–884

The material has been indexed under a subject heading and by author.

ABRAMSON, H. NORMAN, HARRY A. WILLIAMS, AND BRUCE G. WOOLPERT. An Investigation of the Bending of Angle Beams in the Plastic Range 818

ABZUG, MALCOLM, J. Estimation of the Lift and Moment Parameters of Leading-Edge Flaps* 655

Aerodynamics—

Acoustics in Relation to Aerodynamics, E. G. Richardson. 775

Aerodynamics of Blasts—Diffraction of Blast Around Finite Corners, H. F. Ludloff and M. B. Friedman 27

Curved Shocks in Pseudostationary Flows, Ryuma Kawamura and Hakuro Oguchi* 210

Design Charts for Transient Temperature Distribution Resulting from Aerodynamic Heating at Supersonic Speeds, Joseph Kaye and Victor C. M. Yeh 755

Difference Solution of Shock Diffraction Problem, H. F. Ludloff and M. B. Friedman* 139

Gas Dynamic Behavior of Real Gases, L. N. Tao 763

A New Method of Solution of Equation of Compressible Flow, Ezio Betti* 516

Note on Velocity Fluctuations in Equilibrium Turbulent Shear Flow Along Solid Boundaries, Heinrich B. Helmbold* 513

The Obukhoff Spectrum of Homogeneous Isotropic Turbulence, Knox Millsaps* 511

On the Determination of Local Heat-Transfer Coefficients for Bodies with Pressure Gradient in Supersonic Flow, Irving Korobkin* 283

On the Flow Behind an Attached Curved Shock, S. I. Pai* 657

On a Stress Tensor for Turbulence, Willis H. Braun* 510

Remarks on the Velocity of Sound, Max M. Munk* 795

Second-Order Pressure Law for Two-Dimensional Compressible Flow, Wallace D. Hayes* 284

A Similarity Rule for the Interaction Between a Conical Field and a Plane Shock, Y. H. Kuo* 504

The Stability of Vortex Streets with Consideration of the Spread of Vorticity of the Individual Vortices, Ulrich Domm 750

Summary of Recent GALCIT Hypersonic Experimental Investigations, Henry T. Nagamatsu 165

Wedge Pressure Coefficients in Transonic Flow by Hydraulic Analogy, Richard G. Fleddermann and Robert T. Stancil* 271

Aerodynamics, Bodies—

Application of Kelly's Theory to Cone-Cylinder-Frustum Bodies of Revolution, Robert E. Lavender* 654

Comment on "Hypersonic Similarity and the Tangent-Cone Approximation for Unyawed Bodies of Revolution," V. Halbmillion* 871

Erratum—"Wing-Body Interference at Subsonic and Supersonic Speeds—Survey and New Developments," H. S. Bluston and John B. Large* 208

The Generalized Shock-Expansion Method and Its Application to Bodies Traveling at High Supersonic Air Speeds, A. J. Eggers, Jr., Raymond C. Savin, and Clarence A. Syvertson 231

Hypersonic Similarity and the Tangent-Cone Approximation for Unyawed Bodies of Revolution, Ronald F. Probstein and Kenneth N. C. Bray* 66

Normal Force and Center of Pressure on Right Circular Cylinders, J. Leith Potter, William D. Murphree, and Norman M. Shapiro* 214

On the Wake and Drag of Bluff Bodies, Anatol Roshko ... 124

Slender Bodies of Low Wave Drag, R. N. Haskell and G. C. Grogan* 138

The Unsteady Forces on a Circular Cylinder in the Presence of Two Symmetrically Disposed Line Vortices, S. Sherman Edwards* 72

Aerodynamics, Boundary Layer & Skin Friction—

The Application of Finite Difference Methods to Boundary-Layer Type Flows, W. T. Rouleau and J. F. Osterle 249

Approximate Solutions of the Incompressible Laminar Boundary-Layer Equations for a Flat Plate in a Shear Flow, K. T. Yen* 728

The Behavior of the Boundary Layer in the Region of Transition from Laminar to Turbulent Flow, Jerome Persh* 443

Boundary-Layer Stabilization by Surface Cooling in Supersonic Flow, E. R. Van Driest and J. Christopher Boison* 70

Engineering Relations for Friction and Heat Transfer to Surfaces in High Velocity Flow, E. R. G. Eckert* 585

Errata—"Simplified Analysis of Turbulent Boundary-Layer Development Along Cylindrical Surfaces with Variable Free-Stream Mach Number," Hans U. Eckert* 70

Experimental Investigation of Turbulent Boundary Layers in Hypersonic Flow, R. Kenneth Lobb, Eva M. Winkler, and Jerome Persh 1

Forced Convection Through a Laminar Boundary Layer over an Arbitrary Surface with an Arbitrary Temperature Variation, Myron Tribus and John Klein* 62

Aerodynamics, Boundary Layer & Skin Friction (*Continued*)
Frictional Heating of Nonisothermal Walls, Myron Tribus and James E. Mahlmeister* ... 726
Further Comments on "The Effect of Boundary Layer on Sonic Flow Through an Abrupt Cross-Sectional Area Change," Robert S. Wick* ... 135
Further Comments on "Note on Boundary-Layer Transition in Supersonic Flow," A. H. Lange and R. E. Lee* ... 282
Heat Conducting Bodies in Boundary-Layer Flow, Salomon Levy* ... 440
Laminar Compressible Boundary Layer Along a Curved Insulated Surface, Arlo F. Johnson and I. Flügge-Lotz ... 445
Laminar Heat Transfer in Two-Dimensional Subsonic Effusors, Paul A. Libby and Marian Visich, Jr ... 425
Measurements of the Effect of Two-Dimensional and Three-Dimensional Roughness Elements on Boundary-Layer Transition, P. S. Klebanoff, G. B. Schubauer, and K. D. Tidstrom* ... 803
Note on the Compressible Laminar Boundary Layer with Heat Transfer and Pressure Gradient, Eli Reshotko and Clarence B. Cohen* ... 584
Note on a Formula of H. W. Emmons, J. A. Steketee* ... 578
On Compressible Laminar Boundary-Layer Characteristics in a Pressure Gradient with Heat Transfer, Morris Morduchow* ... 444
On Determining Turbulent Boundary-Layer Separation in Incompressible and Compressible Flow, H. Schuh* ... 343
On Distributed Roughness as a Means of Fixing Transition at High Supersonic Speeds, William B. Fallis* ... 339
On the Effect of Reynolds Number upon the Peak Pressure-Rise Coefficient Associated with the Separation of a Turbulent Boundary Layer in Supersonic Flow, E. S. Love* ... 345
On the Laminar Compressible Boundary Layer over a Flat Plate with Suction or Injection, H. G. Lew and J. B. Fanucci ... 589
On the Stability of the Laminar Boundary Layer in a Compressible Fluid, D. W. Dunn and C. C. Lin ... 455
Prediction of Shock-Induced Turbulent Boundary-Layer Separation, Artur Mager* ... 201
A Provisional Analysis of Turbulent Boundary Layers with Injection, Joseph H. Clarke, Hans R. Menkes, and Paul A. Libby ... 255
A Remark on "A Simple Laminar Boundary Layer with Secondary Flow," M. Z. v. Krzywoblocki* ... 582
Reversal of Skin-Friction and Heat-Transfer Trends in High-Speed Laminar Flows, George M. Low* ... 721
Separation of a Supersonic Turbulent Boundary Layer, S. M. Bogdonoff and C. E. Kepler ... 414
Similar Solutions of Compressible Boundary-Layer Equations, Ting-Yi Li and Henry T. Nagamatsu ... 607
Similar Solutions of Turbulent Boundary Layers, J. C. Rotta* ... 215
A Simple Laminar Boundary Layer with Secondary Flow, Henk G. Loos ... 35
Stability of Compressible Laminar Boundary Layer with Internal Heat Sources or Sinks, George M. Low ... 329
Summary of Existing Cone Temperature Recovery Factor Data Obtained in Continuous-Flow Wind Tunnels Plus Additional Data, Leslie M. Mack* ... 212
Turbulent Boundary Layers on Nozzle Liners, R. E. Meyer* ... 572

Aerodynamics, Internal Flow—
An Analytic Method for the Design of Two-Dimensional Asymmetric Nozzles, Hans Peter Liepman ... 701
An Approximation to the Lift of a Two-Dimensional Cascade of Airfoils, B. W. McCormick* ... 730
Comparison of Mixing Processes in Subsonic Jet Pumps, Heinrich B. Helmbold* ... 435
The Correction of Flexible Plate Supersonic Nozzle Contours by Influence Methods, William N. MacDermott ... 289
Design of Two-Dimensional Continuous-Curvature Supersonic Nozzles, James C. Sivells ... 685
Free Streamline Analysis for Slotted Two-Dimensional Supersonic Minimum-Length Nozzles, Robert Wesley Truitt* ... 658
On a Class of Two-Dimensional Channel Flows with a Straight Sonic Line, A. J. A. Morgan* ... 573
On the Decay of a Flow Nonuniformity, William J. Guman* ... 869
On the Design of Two-Dimensional Supersonic Nozzles by the Method of Characteristics, Bernard Chaix and Peter Henrici* ... 140
On the Intermittency of a Two-Dimensional Jet, William H. Hannum and Wayland Griffith* ... 202
On Some Solutions of the Hodograph Equation Which Yield Transonic Flows Through a Laval Nozzle, F. Edward Ehlers ... 107
Remark on Supersonic Nozzle Design, R. E. Meyer* ... 587
Simultaneous Measurements of Velocity and Temperature Profiles for Adiabatic Supersonic Flow of Air in a Tube, Joseph Kaye, George A. Brown, Julius C. Westmoreland, and Edward F. Kurtz, Jr.* ... 575
Simultaneous Turbulent and Laminar Flow in Ducts with Noncircular Cross Sections, E. R. G. Eckert and T. F. Irvine, Jr.* ... 65
The Static Pressure Variation in Compressible Free Jets, Walter R. Warren, Jr.* ... 205
Supersonic Diffuser Instability, Charles Lee Dailey ... 733
Temperature Field in a Laminar Incompressible Round Jet and in Convergent and Divergent Round Nozzle, Dragutin Stojanović* ... 216
Theoretical and Experimental Pressure Recovery of Sweptback Normal Shock Inlets, George D. Dickie, Jr ... 189

Aerodynamics, Turbines & Compressors—
An Approximate Relationship Between Small Radius Ratio Turbine Passage Geometry and Radial Pressure Variation, J. P. Fraser* ... 282
Conditions for the Appearance of Shock Waves in Steady Flows, Raymond Marchal* ... 275
A Note on "A Study of Surge in Compressors and Jet Engines," W. C. Randels* ... 660
Optimum Stage for Axial Flow Turbines, N. Van Le* ... 503
Propagation of Stall in a Compressor Blade Row, Frank E. Marble ... 541
Secondary Flows in Cascades of Twisted Blades, Fredric F. Ehrich ... 51
A Study of Surge in Compressors and Jet Engines, Carl E. Pearson ... 10
Surge Behavior in a Three-Stage Compressor, Carl E. Pearson* ... 799
Unsteady Aerodynamic Reactions on Airfoils in Cascade, F. Sisto ... 297
The Unsteady Forces Due to Viscous Wakes in Turbomachines, Nelson H. Kemp and W. R. Sears ... 478

Aerodynamics, Wings & Airfoils—
Aerodynamics of a Rectangular Plate with Vortex Separation in Supersonic Flow, H. K. Cheng ... 217
Calculation of Span Loading for Arbitrary Plan Forms, John DeYoung* ... 208
Comment on "Calculation of Span Loading for Arbitrary Plan Forms," Johannes Weissinger* ... 870
Comment on "Wedge Pressure Coefficients in Transonic Flow by Hydraulic Analogy," H. J. Bömelburg* ... 731
A Critique of Shock-Expansion Theory, J. J. Mahony ... 673
The Effect of Thickness on Airfoils with Constant Vertical Acceleration at Supersonic Speeds, John C. Martin and Nathan Gerber ... 179

Aerodynamics, Wings & Airfoils (*Continued*)
Equations for the Chordwise Center of Pressure for the Basic Twist Distributions on Triangular Wings Having Supersonic Leading and Trailing Edges, R. N. Haskell, J. J. Hosek, and W. S. Johnson, Jr.* ... 274
Equations for Loading on Triangular Wings Having Subsonic Leading Edges Due to Various Basic Antisymmetric Twist Distributions, R. N. Haskell and W. S. Johnson, Jr.* ... 278
Errata—Nonlinear Lift and Vortex Separation, H. K. Cheng* ... 660
Experimental Investigation of Influence of Edge Shape on the Aerodynamic Characteristics of Low Aspect Ratio Wings at Low Speeds, G. E. Bartlett and R. J. Vidal ... 517
The Flat Plate with an Angle of Attack in a Choked Wind Tunnel, K. Gottfried Guderley ... 844
The Lift and Moment on a Ring Concentric to a Cylindrical Body in Supersonic Flow, F. Edward Ehlers ... 239
The Lift of a Blowing Wing in a Parallel Stream, Heinrich B. Helmbold* ... 341
Lifting Pressure on Delta Wings with Subsonic Leading Edges, Symmetrical Plan Form, and Discontinuous Slope, Paul G. Kafka* ... 725
Limitations of Linear Theory in Predicting the Pressure Distribution on Triangular Wings, Elliott D. Katzen* ... 514
On the Motion of a Flat Plate at High Speed in a Viscous Compressible Fluid, II—Steady Motion, K. Stewartson ... 303
On the Normal Force Produced by Multifinned Tail Assemblies in Supersonic Flow, J. Leith Potter, William D. Murphree, and Norman M. Shapiro* ... 511
A Rigorous Method for Finding the Lift of a Certain Class of Airfoils and Remarks on the Meaning of Schrenk's Approximate Rule, Otto Laporte and Hideo Yoshihara ... 787
The Second-Order Thin Airfoil Theory for Compressible Flow, Isao Imai* ... 270
Simple Shear Flow Past a Flat Plate in a Compressible Viscous Fluid, Ting-Yi Li* ... 724
Simple Shear Flow Past a Flat Plate in an Incompressible Fluid of Small Viscosity, Ting-Yi Li* ... 651
Spanwise Variation in the Pitching-Moment Coefficient and the Center of Pressure Due to Various Basic Twist Distributions on Triangular Wings Having Supersonic Leading and Trailing Edges, Julian H. Kainer ... 598
The Supersonic Conical Wing of Minimum Drag, S. H. Tsien ... 805
On Supersonic Flow Past a Finite Wedge at the Crocco Mach Number, Kō Tamada and Yoshio Shibaoka ... 261
Tests of a Fairing to Reduce the Drag of a Supersonic Swept-Wing Root, W. F. Hilton ... 173
Transonic Lift over the Front Surface of a Two-Dimensional Diamond Airfoil, Robert Wesley Truitt* ... 342

Aeroelasticity—
Aerodynamic Coefficients for Cambering and Aileron Motions, E. F. Tyler* ... 340
Aerodynamic Flutter Derivatives for a Flexible Wing with Supersonic and Subsonic Edges, Samuel Pines, John Dugundji, and Joseph Neuringer ... 693
An Application of Variation Methods to the Computation of the Deformation of a Cantilever Plate Subjected to Nonuniform and Aeroelastically Induced Loads, Eugene E. Covert ... 555
Computation of Vibration Modes and Frequencies on SEAC, William F. Cahill and Samuel Levy ... 837
Determining the Mode Shapes and Frequencies of Low Aspect Ratio Multispar Wings, Marvin L. Stein* ... 137
The Difference Property of the Kernel of the Unsteady Lifting Surface Theory, H. G. Kuessner ... 227
Effect of Rotatory Inertia and Shear on Maximum Strain in Cantilever Impact Excitation, Marcel K. Newman ... 313
Extension of the Statistical Approach to Buffeting and Gust Response of Wings of Finite Span, H. W. Liepmann ... 197
A Fraction Series Solution for Characteristic Values Useful in Some Problems of Airplane Dynamics, E. L. Leppert, Jr ... 326
Iteration in Semidefinite Eigenvalue Problems, B. M. Fraeys de Veubeke ... 710
Matrix Method of Coupling Shear Flexibility and Rotatory Inertia in Bending Vibration, Marvin Stern* ... 276
Methods for Computing Supersonic Aerodynamic Flutter Coefficients for Two-Dimensional Flow, Ernest C. Kennedy ... 310
On Approximate Solutions for the Compressible Flow Around Oscillating Thin Wings, Marten Landahl, Holt Ashley, and Erik Mollo-Christensen* ... 581
Remarks on "An Exact Solution for Two-Dimensional Linear Panel Flutter at Supersonic Speeds," S. F. Shen* ... 656
A Simplified Expression for the Dihedral Effect of a Flexible Wing, W. P. Rodden* ... 579
Some Applications of Generalized Harmonic Analysis to Gust Loads on Airplanes, Harry Press and John C. Houbolt ... 17
Some Considerations on the Air Forces on a Wing Oscillating Between Two Walls for Subsonic Compressible Flow, Donald S. Woolston and Harry L. Runyan ... 41
Some Series Developments in Unsteady Aerodynamics, Peter F. Jordan* ... 722
Some Static Aeroelastic Design Considerations Relating to Flap-Type Control Surfaces, Martin Zlotnick* ... 580
Transient Stresses in Airfoils Under Blast Loading, H. F. Ludloff and F. J. Marshall* ... 508

Amer, Kenneth B., and H. Hirsch. Effect of High Advancing-Tip Mach Number on Helicopter Blade Flapping* ... 505
Ashley, Holt, Marten Landahl, and Erik Mollo-Christensen. On Approximate Solutions for the Compressible Flow Around Oscillating Thin Wings* ... 581

Barnes, Frank A., Robert C. Seamans, Jr., Theodore B. Garber, and Vincent W. Howard. Recent Developments in Aircraft Control ... 145
Barrett, Anthony J. Beam Strength and Curvature Under Combined Tension and Bending in the Plastic Range* ... 71
Bartlett, G. E., and R. J. Vidal. Experimental Investigation of Influence of Edge Shape on the Aerodynamic Characteristics of Low Aspect Ratio Wings at Low Speeds ... 517
Betti, Ezio. A New Method of Solution of Equation of Compressible Flow* ... 516
Bijlaard, P. P. On the Buckling of Stringer Panels, Including Forced Crippling ... 491
Birman, Joan. The Effects of Changes in Aircraft Weight on Flight Equilibrium* ... 61
Bluston, H. S., and John B. Large. Erratum—"Wing-Body Interference at Subsonic and Supersonic Speeds—Survey and New Developments"* ... 208

International Conference on Fatigue in Aircraft Structures

Columbia University, New York, January 30–February 1, 1956

Jan. 30 Physical Theories of Fatigue of Metals.
Jan. 31 Prediction of Fatigue Life and Fatigue Strength (Fatigue Testing with Respect to Design).
Feb. 1 Prevention of Fatigue Failure (Fatigue Design).

Papers by invited speakers from Great Britain, Sweden, Germany, and the United States.

Information: Professor A. M. Freudenthal, 716 Engineering, Columbia University, New York 27, N.Y.
